

# ENGINEERED LININGS

*A division of PSV Industrial Pty Ltd*

***"Providing the best available Geosynthetic lining system and installation service."***

## ***AN INTRODUCTORY NOTE***

Engineered Linings is a specialist civil contracting company, concentrating on the supply and installation of geomembrane linings and associated geosynthetic products for the purposes of containment, environmental and corrosion protection. The company was established in 1984 and operates out of offices in Cape Town and Johannesburg. We are active throughout the African continent having installed 10's Millions square metres of geomembrane linings since our inception in 1984.

**Heap Leach Pads**

**Tailings Storage Facility**

**Floating Cover Reservoir**

## ***MATERIALS***

The most commonly installed linings are High Density Polyethylene (HDPE) and Linear Low Density Polyethylene (LLDPE). These liners offer cost effective containment and environmental protection barriers and are highly durable possessing high resistance properties to a wide range of chemicals and UV light.

## ***TECHNICAL***

We assist local and international Consultants and offer our skills and technical knowledge gained from decades of experience in the geomembrane lining industry. We continue to remain abreast of new research and development within our industry and offering our clients a complete geosynthetic lining solution.

**Landfill Site**

**Oxidation Ponds**

**Hazardous Lagoon**

## ***QUALITY***

Our extensive client base bears testimony to the quality of service we have been providing for over 30 years. It includes mining houses, government institutions, major civil consultants, contractors and waste management companies. Our materials conform to GRI-GM, SANS and most other major International specifications. Our ISO 9001:2008 registration plays a significant role in ensuring the highest standard of Quality Control and Quality Assurance prevails in all aspects of our operations.
